

FACTS ABOUT RADON

- According to the Surgeon General of the United States, Radon is the second leading cause of lung cancer within the USA
- Since Radon is a colorless, odorless, and tasteless gas, the only way to determine if Radon is entering your home is by testing.
- Radon comes from the natural decay of uranium found in soil, rock and water.
- This dangerous and life threatening radioactive gas enters your home by way of tiny cracks or holes in a structure's foundation.
- Radon can also get into your drinking water

Let the experts at Mid-Atlantic laboratories help you find out if you have a Radon problem
